APPROACH & SERVICES

URBAN HABITS - CONTRACT DIVISION

SOLUTION PROVIDER

Urban Habits chooses to be a strategic / knowledge partner as well as a supplier of products. The division is backed by strong brand values & a design-cum-production facility

ACCOUNT & PROJECT MANAGEMENT

Every client is unique, distinct, brings it's own character, and comes with high expectations (of both architect & client). In order to provide solutions, we listen to the clients needs, identify nuance and provide support that fulfils their dream.

Team Urban Habits is available at all times.

OPERATIONS & PROCESS

This is involved in all the stages of each project. The sketch to build gets into action at this stage, discussing, detailing, drawing, prototype, template & in some most cases samples. This enables design and quality check list that helps discover any problems in later construction and add improvements & also abet finalization with client & designer.

This we call - bespoke indulgence!

URBAN HABITS - CONTRACT DIVISION

LOGISTICS

An important activity in the flow, is enabling perfect packaging to weather the journey to the clients project site. This service team organises, coordinates, supplies products and materials adhering to the terms of contract. The logistic provider is appropriately selected and given the do's and don't's before dispatch.

Bespoke approach just doesn't end here!

FITMENT & INSTALLATION

On D-Day, we get busy unwrapping, assembling, installing, aligning & fulfilling furniture layout to ensure the art form in furniture comes alive at the client's space. We also ensure onsite quality control, and final client approval is secured. This final step is as critical to us as the first step!

Bespoke reaches it's destination, Finally!
